ERV

EMERGENCY RESPONSE VEHICLE

Watergen's ERV is a customized heavy-duty truck which securely transports Watergen's Atmospheric Water Generator to provide clean drinking water from air in emergency situations and natural disasters.

SPECS

- Generates up to 156 gallons (600L) of clean fresh drinking water daily
- Dispenses cold or ambient water
- Energy efficient
- Storage for emergency medical supplies and provisions
- Installed DC Outlets with battery charging capacity for communication devices
- Dimensions: 8' x 24' x 8.75' (2.4m x 7.3m x 2.7m)
- Available Add-Ons:
 - 260-390 gallon (1000-1500L) water reservoir
 - 130 gallon (500L) fuel tank for week long operation
 - Emergency Lighting
 - Custom logo or paint
 - WIFI

ADVANTAGES

- Highly mobile
- Designed for emergency situations and natural disasters
- Produces water in areas with no potable water source
- Dispenses water in areas both with and without an operating electric grid
- Fast and easy deployment in most weather conditions, remote areas and difficult to access locations
- Indoor and outdoor usage
- Ideal for long term sustainable water generation throughout all phases of emergency and crisis response

COMPONENTS

- Heavy Duty 4x2 or 4x4 Truck
- Watergen 350 Atmospheric Water Generator with Integrated 51 Gallon (200L) Water Tank
- Caterpillar 18KVA Diesel Generator

Watergen is the innovative answer to the world's drinking water crises.

Watergen USA's Atmospheric Water Generating technology creates "water from air" in an efficient, cost effective system.

Watergen USA's award-winning products deliver large quantities of life sustaining, high quality cold drinking water.

Watergen USA's secure and reliable water sources comply with World Health Organization (WHO) and Environmental Protection Agency (EPA) standards.
